

## This week's new unique cabin cableway loading tests ...

30 November 2009

*The Webis s.r.o. investment company confirmed that the new cabin cableway loading tests will be carried out at the Jasná Nízke Tatry resort as early as 3 December 2009.*

In accordance with our promise of last week, the new cableway loading tests will be carried out since the early morning hours of **Thursday, 3 December 2009**.

The tests will be carried out with the help of sacks fully loaded with sand and granulated gravel, thus loading the cableway with the weight of over **21 tons**.

The winter season opening will depend on the weather. An advantageous offer of winter residence packages offering **30% discounts** on the packages already on sale has been prepared by the resort.

*According the investor's statement the construction works are going on in accordance with the original schedule.*
